Chennai, Tamilnadu | 9659325466 | <https://abhijithv224.github.io/Portfolio/> | abhijithv2204@gmail.com | <https://www.linkedin.com/in/abhijith-v-98b493281/> | <https://github.com/Abhijithv224>

PROFESSIONAL SUMMARY

Motivated and detail-oriented Data Analyst and Computer Science student with a strong foundation in Python, SQL, and data analytics. Experienced in data cleaning, exploratory data analysis (EDA), and building interactive dashboards using Power BI to extract actionable insights. Skilled in working with NumPy, Pandas, and SQL-based data transformations, with growing expertise in ETL pipelines and big data tools..

TECHNICAL SKILLS

Languages : Python, Basic Java, SQL, Javascript
Libraries : Pandas, Numpy, Matplotlib, Seaborn, Scikit-learn, Joblib, Pyspark
Data Analytics and Machine Learning : Data Analysis, Exploratory Data Analysis (EDA), Data Cleaning and Preprocessing, Feature Engineering, Statistical Analysis, Data Visualization, Apache Spark, Machine Learning Algorithms (Regression, Classification),NLP, Model Evaluation, Data Warehousing Concepts, Dashboard Development (Power BI), Hadoop, Hive, ETL Pipeline Development, Microsoft Azure (Fundamentals / Data Engineering Basics).
Databases and Tools : MongoDB, MySQL, Docker, Git, FastAPI

EXPERIENCE

Machine Learning Intern | Atharvo India Pvt. Ltd., Bengaluru June 2024 – July 2024
– Performed data cleaning and exploratory data analysis (EDA) using Python (Pandas, NumPy) and SQL to extract meaningful insights from structured datasets.
– Designed and developed interactive dashboards using Microsoft Power BI to visualize trends in Car Sales and Weather datasets, enabling effective data storytelling and KPI tracking.Implemented machine learning workflows, including data preprocessing, feature engineering, and model development using Scikit-learn, gaining hands-on experience in regression and classification techniques.
Data Analytics Visualization | Virtual Internship Accenture (via Forage) May2024
– Completed a project-based analytics simulation, applying real-world data analytics workflows including data cleaning, transformation, and modeling to derive actionable business insights.
– Performed data preprocessing and analysis to identify trends and patterns, supporting data-driven decision-making through structured datasets.

EDUCATION

Dhanalakshmi Srinivasan Engineering College Jay Tech International Sr.Sec.School	B.E Computer Science and Engineering CGPA : 8.4 HSE PERCENTAGE:80	2022 – 2026 2021 – 2022
---	--	----------------------------

PROJECTS

HDFS-Based ETL and Reporting on NYC Taxi Dataset | Python, SQL, Pandas, NumPy, Hadoop HDFS, Power BI Spring 2026
– Built an end-to-end ETL pipeline using Python to process 6.4M+ NYC Yellow Taxi records, performing data cleaning, transformation, and loading into Hadoop HDFS for scalable storage.
– Optimized large-scale data handling by converting datasets from CSV to Parquet format, improving query performance and storage efficiency in a distributed environment.
– Developed analytical data models and queries using Apache Hive, enabling comparison of trip metrics (volume, fares, speed) across time periods and uncovering seasonal trends.
PaperBot – AI Research Assistant (RAG-based LLM System) | Python, LangChain, Streamlit, RAG, Vector Embeddings NOV 2025
– Developed a Retrieval-Augmented Generation (RAG) based AI assistant using LangChain and Large Language Models to enable context-aware querying of academic research papers.
– Integrated Semantic Scholar API to fetch and display relevant papers, including abstracts, authors, and full-text PDFs for seamless exploration.
– Built an interactive user interface using Streamlit, enabling users to search, read, and chat with research papers in real time.
Airline Performance Analytics Dashboard | Python, Pandas, NumPy, Power BI, SQL OCT 2025
– Analyzed airline operational datasets to identify patterns in flight delays, cancellations, and overall performance metrics, performing data cleaning, preprocessing, and exploratory data analysis (EDA) using Python (Pandas, NumPy) to ensure data quality and uncover trends; developed an interactive dashboard using Microsoft Power BI to visualize key KPIs and performance insights.

CERTIFICATIONS

Supervised Machine Learning: Regression and Classification COURSERA	JULY 2025
Data Analytics Essentials Cisco Networking Academy	APRIL 2024
Learning Microsoft Power BI INFOSYS SPRINGBOARD	MAY 2024
Data Science Using Python NPTEL	OCTOBER 2024
